| 2) <input type="checkbox"/> Notice of Draftsperson's Patent Drawing Review (PTO-948) | 5) <input type="checkbox"/> Notice of Informal Patent Application (PTO-152) |

1. The disclosure is objected to because of the following informalities: the specification must include reference numerals for each element specified in the drawings to provide a clear understanding of the invention. See CFR 1.71.
2. The substitute specification, filed October 11, 2002, has not been entered since it included new matter. The substitute specification, filed March 24, 2003, has not been entered since it included new matter. The substitute specification, filed on July 25, 2003, has not been entered since it was not fully responsive to the prior Office action because the marked-up version of the specification and claims must be made with respect to the pending specification and claims.
3. The substitute specification, filed on November 11, 2003, has not been entered because the marked-up version of the specification must be made with respect to the pending specification. Further note that the substitute specification, filed on November 11, 2003, includes words that are bracketed and underlined. The use of double-underlining is also not permitted. It is suggested that deleted subject matter be bracketed and added subject matter be underlined. The pending specification (the original specification) must be submitted in proper marked-up form to enable the entry of the new specification.
4. Claim 36 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claim 36, line 15, "said ferrule is not compressed" lacks support in the original specification. The original specification defines a ferrule that is compressed, hence "compression ferrule".

5. Claim 13 is allowed. Claims 1-12 and 14-35 have been canceled by applicant.
6. Applicant's arguments filed July 25, 2003 have been fully considered but they are not persuasive.

Claim 36 contains new matter as discussed, above.

The substitute specification, filed on November 11, 2003, has not been entered because the marked-up version of the specification must be made with respect to the pending specification. Recitations cannot be both bracketed and underlined. The use of double-underlining is also not permitted. It is suggested that deleted subject matter be bracketed and added subject matter be underlined. The pending specification (the original specification) must be submitted in proper marked-up form to enable the entry of the new specification.
